What are edgerack integrated micro data center cabinets?

The EdgeRack integrated micro data center cabinets were manufactured to solve networking problems common to organizations across the globe. They're suitable for businesses big and small and are deployable in both traditional and non-traditional IT environments.

What is edge computing & how does it work?

Edge computing is a distributed computing framework with the goal of processing data closest to where it's actually generated (Ex. IoT devices, sensors, local servers, etc.). Doing so reduces network latency, saves bandwidth, and gives businesses near real-time insights.

What is a smart server cabinet?

All-in-one, secure, smart server cabinet designed for swift deployment. Equipped with environmental sensors and remote monitoring/management features, a touch screen display, power, efficient self-contained cooling (3.5kW), and a UPS. Self-contained micro data center for edge computing.

What is an Enconnex edgerack micro data center?

All-in-one, self-contained, prefabricated micro data centers for edge computing. With up to 8kW of integrated cooling, EdgeRacks are ready to be deployed wherever you need them. Your personal, self-contained data center. The Enconnex EdgeRack micro data center line is your complete on-premise networking solution.
