Is 2025 a good year for energy storage installations?

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From price swings and relentless technological advancements to shifting policy headwinds and tailwinds, 2025 proved to be anything but uneventful.

How has China impacted the energy storage industry in 2025?

In 2025, China made a couple of major political moves affecting its energy storage sector. In late November, the Ministry of Industry and Information Technology (MIIT) pledged to accelerate the rollout of targeted policies aimed at curbing "irrational competition" in the power and battery energy storage industry.

How much energy storage was deployed in 2024?

Approximately 11.9 gigawatts (GW) of storage was deployed in 2024. In only the third quarter of 2024, and despite mounting concerns over potential trade and policy developments, the US storage market added a record-setting 3.8 GW of energy storage--an 80% increase compared to the prior year.

What happened to battery revenues in 2024 & 2025?

In Texas, battery revenues fell sharply through 2024 and 2025 and nearly 90% since 2023, while in California net annual revenues per kilowatt of battery capacity declined from \$103/kW in 2022 to \$78/kW in 2023 and just \$53/kW in 2024 as peak-hour power prices softened.

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on the horizon--tariffs, shifting tax incentives, ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on the horizon--tariffs, shifting ...

New energy storage also faces high electricity costs, making these storage systems commercially unviable without subsidies. China's winning bid price for lithium iron phosphate energy storage ...

NYSEG and RG& E will review bidder submissions to Phase I, and notify bidders of their approval to submit a Phase II bid on September 22, 2025. Please review all requirements and details of the RFP ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on ...

June 25, 2025 | Beijing, China -- China Energy Engineering Group Co., Ltd. (CEEC), one of the country's leading state-owned energy conglomerates, has officially opened the bidding for its 2025 ...

Energy storage project winning bid announcements have become the industry's report card, revealing who's leading the race to balance renewable volatility. Let's unpack what these bids ...

Energy storage project winning bid announcements have become the industry's report card, revealing who's leading the race to balance renewable volatility. Let's unpack what these bids truly signal ...
