What is the energy storage roadmap?

First established in 2020 and founded on EPRI's mission of advancing safe, reliable, affordable, and clean energy for society, the Energy Storage Roadmap envisioned a desired future for energy storage applications and industry practices in 2025 and identified the challenges in realizing that vision.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

Why should energy storage companies focus on industry disruptions?

Maintain awareness and strategic focus on broad industry disruptions that may shape or complement energy storage deployment and use. The industries responsible for energy storage have access to skilled workforce and development programs to address storage opportunities.

Why was the energy storage roadmap updated in 2022?

The Energy Storage Roadmap was reviewed and updated in 2022 to refine the envisioned future states and provide more comprehensive assessments and descriptions of the progress needed (i.e., gaps) to achieve the desired 2025 vision.

In line with ESA's vision of 35 GW of new energy storage by 2025, ESA must also grow to meet the challenges of an expanding market. In this strategic plan, ESA focuses on 7 core areas of ...

This study briefly introduces the important role of energy storage in global green energy revolution and the development status of the global energy-storage industry.

Energy models are simplified representations of energy production and consumption, laws and regulations, and producer and consumer behavior. ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

Energy models are simplified representations of energy production and consumption, laws and regulations, and producer and consumer behavior. Projections are highly dependent on the ...

I R system reliability and resilience. This roadmap envisions a path to 2025 where energy storage enhances safe, reliable, affordable, and environmentally responsible electric power. This roadmap ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC ...
