In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

The global lithium-ion battery energy storage market size was valued at USD 24.80 billion in 2024. It is projected to be worth USD 32.37 billion in 2025 and expected to reach USD 113.64 ...

Due to increases in demand for electric vehicles (EVs), renewable energies, and a wide range of consumer goods, the demand for energy storage batteries has increased considerably from ...

Global LIB demand is projected to reach 6,530 gigawatt-hours by 2050, thirty times the 2020 level, driven by the demand for renewable energy and electric transportation. The Chinese ...

Energy storage is becoming a high-growth area, fueled by large-scale renewable energy integration and the need for grid stability. Industrial uses increasingly incorporate lithium-ion batteries for automation, ...

Lithium-ion batteries dominate both EV and storage applications, and chemistries can be adapted to mineral availability and price, demonstrated by the market share for lithium iron phosphate (LFP) ...

Lithium-ion batteries are ideal rechargeable battery used in EVs, renewable energy storage. Increasing transition towards green energy is driving market growth. ...

Significant technological advancements are enhancing battery energy density, lifespan, and safety, leading to wider applications in residential, commercial, and utility-scale energy storage ...
