Will Morocco develop a gas-fired power plant in 2025?

On April 23, 2025, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure for natural gas reception, storage, re-gasification, and transport, alongside a gas-fired power plant.

How can Morocco improve the security of the energy supply?

The Government of Morocco seeks to increase the security of the energy supply by reducing dependence on imports, including increasing the use of renewable sources for electricity production. As of the end of 2023, the share of renewable energy in the electrical capacity mix stood 11.42 GW (ANRE data).

How much electricity does Morocco produce in 2023?

According to the National Electricity Regulatory Authority (ANRE), Morocco's electricity production in 2023 came from coal (64 percent), hydroelectricity (0.8 percent), fuel oil (3.8 percent), natural gas (10 percent), wind (15.4 percent), solar (5.1 percent), pumped storage power plants (PSP - STEP in French) 0.4 percent, others 0.4 percent.
