When will the European Solar charter be implemented?

One year following the signature of the Charter, the Commission will review the implementation of the adopted commitments. The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

What is the European Green Deal & REPowerEU package?

The European Green Deal and REPowerEU package set ambitious climate and energy targets, including achieving net-zero emissions by 2050. Both initiatives prioritize energy storage as essential for stabilizing renewable energy supplies and improving grid resilience.

How does the EU support energy storage development?

State Aid and National Support for Storage EU guidelines under the Emissions Trading System (ETS) allow member states to support energy storage development through subsidies and other incentives. This approach supports a wide range of storage technologies and highlights the EU's commitment to fostering a balanced and adaptable energy ecosystem.

What is a long-term contract?

Long-term contracts will need to go beyond standard forward contracts on the day-ahead market. Specific contracts, such as Power Purchasing Agreements (PPAs) are needed to target actors with different risk profiles (retailers, intermittent RES producers, storage operators, aggregators, conventional generators).

To this end, we propose a contractual structure that guarantees fixed revenues based on the arbitrage potential of the day-ahead market, thereby improving the ability of project developers to ...

Developers can use a variety of contract structures to do so and will often enter into EPC contracts and long-term service agreements with their ...

One audience member asked about the extent to which European markets were designing procurement and support schemes specifically for long ...
