Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Why should a private financier invest in a Bess project?

This offers comfort to private financiers to provide capital at a competitive rate. Independent BESS projects, only supporting renewable energy projects, can be bundled together, and issued as green bonds to potential large investors.

Is Hungary stocking up on battery backup?

Hungary isn't alone in stocking up on battery backups as it charts its green energy path. In neighbouring Bulgaria, a massive 124MW/496MWh battery energy storage system went live in Lovech earlier this year.

How can a Bess adopter generate more revenue?

Another evolving model that can create an additional revenue stream for BESS adopters is the trading of green credits by virtue of facilitating clean energy. This is increasingly relevant as more countries are establishing structured and regulated carbon markets in their jurisdictions as per global best practices.

Evolution of debt financing for BESS. This article draws on our experience supporting a broad range of investors, lenders & optimisers with the ...

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and ...

Battery storage is increasingly seen as a cornerstone of the energy transition, offering grid stability and flexibility as renewables surge. The new ...

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative ...

A recent legislative act in Hungary laid down the principles for the eagerly awaited battery energy storage systems (BESS) support scheme. The incentives follow well-known patterns similar ...
