Why is a Bess project a good investment in Australia?

The increase in energy consumption, driven by rapid electrification, data consumption and AI, coupled with Australia's supportive regulatory policies and record low renewable energy capital expenditures (capex) costs, have fuelled a competitive environment for quality BESS projects.

Where is the largest Bess project in Australia?

The largest BESS project reaching financial commitment for the quarter was in Wooreen, Victoria, with a storage capacity/energy output of 350 MW/1.4 GWh, and duration of four hours, while South Australia had the largest share of financially committed storage projects in capacity (640 MW /1.8 GWh).

Which Bess projects have secured financial commitment in the first quarter 2025?

The remaining BESS that secured financial commitment in the first quarter of 2025 include Copenhagen Infrastructure Partners' 240MW/960MWh Summerfield BESS, Intera Renewables' 250MW/500MWh Limestone Coast North Energy Park, and Amp Energy's 150MW/300MWh Bungama BESS (stage one), all located in South Australia.

What does the 2022 integrated system plan mean for Australia?

The 2022 Integrated System Plan, released by the Australian Energy Market Operator (AEMO), highlights that the forecasted withdrawal of approximately "8 gigawatts (GW) of the current 23 GW of coal-fired generation capacity by 2030" will introduce complexities within the National Electricity Market (NEM).
