Does Home Depot install solar?

During your free in-home consultation, The Home Depot's local solar power installer will clearly explain the installation process and how easy it is for you to go solar. By powering your home with clean, renewable solar energy, you're creating a healthier environment and conserving natural resources.

What is a residential solar power system?

A residential solar power system consists of photovoltaic panels and other equipment that collect sunlight to produce energy for your home. How many solar panels do I need?

Are solar power systems right for You?

Solar power systems are leading the global movement toward clean, renewable energy. If you own your home and think you are paying too much for electricity, then solar power may be the right clean energy option for you. When you go solar, you get more control of your monthly electricity costs.

How many solar panels do I Need?

The number of solar panels you'll need to meet the energy demands of your home depends on your home's location and roof size. Please set up an in-home consultation with Home Depot's local solar panel installer to discuss how many solar panels you will need. How much energy will my solar panels produce?
