Can I rent a server rack Through colocation?

Renting a server rack through our colocation takes the strain off your IT department. We can provide you with either a server rack with up to 46 rack units or space for a rack. What is a server rack? Our server rack is a standardised server cabinet with up to 46 rack units for accommodating and operating servers.

What is a server rack?

Server rack is a framework for the organized hosting of servers, storages and network equipment in a data center. A full rack provides from 42 to 47 units - cells for placing equipment. You can rent the entire rack or each individual unit in it to house a server.

Can I rent a rack for a server?

You can rent the entire rack or each individual unit in it to house a server. Regardless of the number of rented units in the rack, the client is provided with a full package of services for the use of hardware capabilities, uptime, hardware monitoring, technical and service support.

How do I rent a rack in the data center?

To rent a rack or rack space in the data center you need to contact our support team. During a free consultation, you will receive comprehensive information about the terms of the rent and technical details, as well as an estimate of the cost of services.
