It ensures optimal use of the vessel's total power resources in a safe, energy efficient and environmentally-friendly manner. The PEMS(TM) is closely ...

PNNL is a U.S. Department of Energy (DOE) Office of Science National Laboratory with core capabilities including chemical and material sciences, engineering, biological and earth ...

For ports interested in electricity storage (for example, to reduce the peak load on their local distribution network) it is important to assess the different storage technologies available ...

With one of the largest and most experienced teams of power systems engineers and field service specialists in the industry, we are uniquely qualified to help ports achieve safety objectives through a ...

Cost-efficient and reliable electrification of container terminals from design to project execution - with ABB's domain expertise on container terminals and power distribution in utility and industry applications.

Experience with a range of solutions, from more simple energy storage, digital optimization or shore power options to full "energy park" or microgrid know-how; that can help to avoid having ...

Experience with a range of solutions, from more simple energy storage, digital optimization or shore power options to full "energy park" or microgrid know-how; that can help to avoid having just one ...

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC ...
