Are energy storage procurements cost-effective?

Two special studies present additional analytics on energy storage procurement cost-effectiveness: future procurements to meet resource adequacy (Attachment B) and gas-fired peaker replacements (Attachment C).

Should ISC agreement structure be adopted for initial procurement of utility-scale energy storage resources?  
Should ISC agreement structure be adopted for the initial procurement of utility-scale energy storage resources. Given the successful implementation of CfD in Illinois RPS and their ability to provide a balanced approach to risk allocation, as well as the condensed timeline to conclude the initial procurement

Should the initial procurement use an ISC agreement structure?  
The initial procurement should use an ISC agreement structure, rather than a tolling agreement structure. An ISC agreement structure which is a contract for difference, is currently used in utility-scale renewable energy credit procurements conducted by the Illinois Power Agency (IPA) to implement the Renewable Portfolio Standard (

Is California a prudency review of energy storage resource procurement?  
This study's analytical approach builds upon and expands California's evaluation methodologies across four dimensions. The historical evaluation in our report is not intended to be--nor would it be correctly interpreted as--a prudency review of any individual energy storage resource procurement.
