Designed with a focus on cost-efficiency, safety, ease of maintenance, system compatibility, and environmental sustainability, it provides a localized and high-performance solution for global ...

Near infrared (NIR) reflective pigments and dispersions, or "cool colors", can be used to significantly reduce the amount of heat absorbed by structures in comparison with other pigments in the same ...

Ultramarine blue pigment (UB) is an inorganic low-cost pigment with high pigmentary properties that is commonly used in construction sector. The aim of this study is to develop a cool pigment based on ...

Designed with a focus on cost-efficiency, safety, ease of maintenance, system compatibility, and environmental sustainability, it provides a localized and high-performance solution for global energy ...

This system beautifully bridges the gap between fluctuating energy demand and unreliable power supply, allowing the free flow of energy during the night or on cloudy days.

By delivering high-quality iron oxide materials for both pigment and battery applications, Feiyan Pigment is driving progress toward a cleaner, safer, and more efficient ...

As a pigment supplier, I've witnessed firsthand the transformative impact these substances can have on energy storage technologies. In this blog, I'll explore how pigments are used in the ...

As a pigment supplier, I've witnessed firsthand the transformative impact these substances can have on energy storage technologies. In this blog, I'll explore how pigments are used in the energy storage ...
