Where can I find information about power plants in Portugal?

Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth Data and information about power plants in Portugal plotted on an interactive map.

How many power plants are in Portugal?

Portugal has 457 utility-scale power plants in operation, with a total capacity of 14582.6 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth

What are some power stations in Portugal?

The following page lists some power stations in Portugal . / 38.675; -9.054 ( Barreiro Thermal power station) / 40.340; -8.197 ( Aguieira Dam) / 41.872; -8.204 ( Alto Lindoso Dam) / 41.739; -7.857 ( Alto Rabag&#227;o Dam) 68? MW / 41.574639; -7.731111 ( Alto T&#226;mega Dam) / 38.195; -7.497 ( Alqueva Dam) / 41.300; -6.470 ( Bemposta Dam)

How many hybrid storage projects are being deployed in Portugal?

Additional hybrid capacity is being deployed, namely by Iberdrola, Greenvolt, Akuo, EDP and GALP, supported by Portugal's Recovery and Resilience Plan (PRR) programme under the "Flexibility and Storage" incentive call. Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants.

Energy Storage: Portugal is investing in energy storage technologies, such as pumped hydro storage at the Alqueva Plant, to manage the variability of renewable energy sources and ensure grid stability.

We specialize in renewable energy storage solutions for residential, industrial, and urban applications. With expertise in lithium-ion and smart grid integration, we support clients globally in achieving ...

Nestled in the rugged hills of northern Portugal, the Porto Novo Pumped Storage Power Station stands as a marvel of modern energy engineering. Located near the Douro River basin, this ...

"A single 500kWh battery system can power 150 households for 8 hours during outages." - Portuguese Energy Regulatory Authority

Source: <https://www.spmgsa.co.za/Tue-02-Jul-2024-31763.html>

As of mid-2025, total installed and near-operational capacity amounts to roughly 120 MW, with several hundred megawatts in development.

After analyzing the future challenges that Portugal will face and its decarbonization targets, a necessary growth of up to 50% in storage capacity could be anticipated

Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants.

Information on gross annual electricity production, availability and installed capacity. Data is available by technology and breakdown by NUTs (Nomenclature of territorial units for statistics) level I (mainland ...
