Will trump approve solar or wind power projects?

Wind turbines operate at a wind farm near solar panels near Palm Springs, California, on March 6, 2024. President Donald Trump on Wednesday said his administration will not approve solar or wind power projects, even as electricity demand is outpacing the supply in some parts of the U.S.

Who owns wind and solar power in Wisconsin?

In Wisconsin, the state's Public Service Commission has siting authority of wind and solar projects at or above 100 MW. Local governments retain jurisdiction over smaller-sized systems. A locally imposed restriction, though, must meet one of three conditions:

Does Michigan have statewide standards for wind and solar projects?

As in Illinois, Michigan now has binding statewide standards for wind and solar projects, as the result of legislation signed into law in 2023.

Who oversees wind and solar projects in Minnesota?

In Minnesota, the state's Public Utilities Commission has oversight for wind projects above 5 MW and solar projects above 50 MW. State law also requires the commission to take local zoning and land use rules into account and defer to them when practicable.
