Solar panels cost between \$2.55 and \$3.15 per watt. For an average 6.5 kW solar system, you'll spend anywhere from \$16,600 to \$20,500 before accounting for ...

Residential solar panel systems cost \$0.09 to \$0.11 per kilowatt-hour (kWh) installed on average, though prices vary greatly ...

HomeAdvisor's Solar Panel Price Guide gives the average home solar system and panel prices. Explore solar panel pricing per watt or square foot.

Solar panels cost between \$2.55 and \$3.15 per watt. For an average 6.5 kW solar system, you'll spend anywhere from \$16,600 to \$20,500 before accounting for tax credits or rebates.

MUCH definition: 1. a large amount or to a large degree: 2. a far larger amount of something than you want or need.... Learn more.

Historic Low Pricing: Solar costs have reached unprecedented lows in 2025, with systems ranging from \$2.50-\$3.50 per watt installed, making the technology more accessible than ever before.

Compare quotes using "cost per watt." Like price per square foot for homes, this metric (typically \$2 to \$3 per watt) helps you compare solar companies fairly, regardless of system size.

Ultimately, many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt. This price will vary if a project requires special adders like ground ...
