How much does it cost to replace a car battery?

The average cost of replacing a car battery is \$120. However, actual costs range between \$40 and \$250 depending on the group size, cold cranking amps, reserve capacity, etc. In addition, if you have a mechanic install the battery for you instead of doing the work yourself, you'll pay around \$30 in labor.

How much does an AGM battery cost?

Expect to pay \$230 to \$450 or more for an AGM battery. The added cost comes with benefits like longer life and less maintenance. Premium batteries are built for vehicles that demand even more. Performance cars, offroad vehicles, and hybrids often require unique battery types like lithium-ion. These can cost \$300 to \$500 or even higher.

Can a car battery be replaced?

The first few times it happens, you can try using jumper cables to start the vehicle anyway. But, if your vehicle's battery is no longer storing enough power, you'll eventually have to replace it. Luckily, car batteries are easy to replace, and you can normally get back up and running with no help from a mechanic.

How do you replace a battery?

Carefully lift out the old battery. Look for any corrosion on the cables and remove it with a wire brush or terminal cleaning tool. Drop in the new battery so that the positive post lines up with the red cable. Secure it with the battery retaining clamp that you removed earlier.

What is a cylindrical lithium-ion battery? A cylindrical lithium-ion battery is a type of lithium-ion battery with a cylindrical shape using a metal can as its packaging material.
