What is the tariff landscape for lithium-ion LiFePO4 battery imports from China to USA?

Current Tariff Landscape for Lithium-ion LiFePO4 Battery Imports from China to USA is a complex mix of tariffs. As of April 2025, total tariffs range from about 70% to over 170% depending on battery type and classification.

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.

What are China's battery tariffs?

Recent trade actions have introduced significant battery tariffs on goods imported from China. These changes include duties as high as 104% on some clean energy components, including lithium-ion batteries, critical for energy storage and EV systems. According to U.S. import data, lithium battery shipments from China reached \$1.9 billion in 2024.

What are the tariffs on batteries in 2025?

As of April 2025, total tariffs range from about 70% to over 170% depending on battery type and classification. This includes a 3.4% base duty, a high Section 301 tariff, and extra surcharges, making imports much more expensive and encouraging domestic production.

The 10% tariff will combine with a 3.4% tariff on all battery goods and a Section 301 tariff of 25% (from 2026 for BESS, already in-place for EVs) to result in a total tariff on Chinese ...

Altogether, the full tariff paid by importers will increase from 10.9% to 28.4%. Lithium-ion battery modules, packs, and container blocks are generally categorized under import code ...

The Port Louis energy storage system cost typically ranges between \$280/kWh to \$450/kWh for lithium-ion battery solutions, depending on scale and configuration.

The tariff on energy storage batteries in the United States varies based on several factors and is subject to ongoing changes influenced by trade policies and market conditions.

The 10% tariff will combine with a 3.4% tariff on all battery goods and a Section 301 tariff of 25% (from 2026 for BESS, already in-place for EVs) to result in a total tariff on Chinese batteries of ...
