---

Four regions were identified according to the level of wind energy potential. Statistical analysis including wind flow power calculation was performed for each location.

This study records the technical and financial feasibility of establishing hybrid solar photovoltaic and wind power stations in Iraq, Al-Rutbah and Al-Nasiriya, with a total power of ...

Surprisingly, excess wind power is now fueling green hydrogen production in Kurdistan. The 40MW H2 facility in Duhok stores energy as ammonia - a solution that's sort of bridging seasonal gaps in wind ...

Last week, Wasit province in Iraq opened investment tenders for more than 25 renewable energy projects. These projects include solar and wind power. The total combined capacity is 3,000 ...

Let's be real: when you think of Iraq, solar panels and microgrids might not be the first things that come to mind. But guess what? The country is quietly becoming a hotspot for energy ...

A month earlier, US-based developer UGT Renewables unveiled plans to build a 3 GW solar project in Iraq under a deal with the federal ...

The Zhangbei National Wind and Solar Energy Storage and Transmission Demonstration Project will eventually grow to include 500 MW of installed wind capacity, 100 MW of installed solar PV ...

A month earlier, US-based developer UGT Renewables unveiled plans to build a 3 GW solar project in Iraq under a deal with the federal government that also includes 500 MWh ...
