What is a solar energy storage system?

An Energy Storage System powers the base load with solar during the day and stores excess solar energy to power through the evening and night enabling self-consumption, the grid assists in powering peak consumers or on grey days. An off-grid system powers all loads 24/7 based on worst case scenarios as there is no reliance on a grid.

Are grid tie solar systems a good investment?

Being able to generate your own energy simply makes you happy. It is that standard feeling of owning something like car, home, bicycle, camera, or energy. Energy Generation is one part of the joy, but storing it, and being able to stay independent from public grid is pure happiness. Grid tie solar systems are no doubt good investment today.

These systems are pivotal for applications ranging from residential energy storage, to providing backup power, to integrating with renewable energy sources, and even in supporting grid services.
