We have partnered with a number of Independent Power Producers (IPPs) to diversify our energy supply and put our island's renewable resources to work. We have harnessed the cool Jamaican breeze, ...

Conduct technical and financial feasibility studies for solar, wind, and energy storage projects. Deliver risk assessments to ensure compliance with local and international ...

Summary: Jamaica is embracing innovative energy storage solutions to support its renewable energy transition. This article explores the latest technologies, government initiatives, and real-world ...

According to researchers Delmaria Richards and Helmut Yabar, Jamaica is unlikely to meet its ambitious target of 50% renewable energy generation by 2030. The study projects ...

Jamaica has set an ambitious target to generate 30% of its energy from local renewable sources, such as hydro, wind and solar ...

Investment in battery storage will help manage the intermittent nature of solar and wind, ensuring a reliable power supply. Innovations like floating solar and green hydrogen could further ...

Jamaica has set an ambitious target to generate 30% of its energy from local renewable sources, such as hydro, wind and solar power by 2030. BMR Energy developed, owns and operates ...
