The IP54 waterproof shell makes it perfect to adapt to a variety of indoor or outdoor industrial and commercial application scenarios, such as photovoltaic charging stations, industrial parks, farms, etc.

Combined with EMS to achieve intelligent operation. Apply to green emergency power backup. Suitable for peak-load shifting and saving electricity bills.

The protection level is IP54, which can perfectly cope with various types of outdoor weather, a critical feature for a durable outdoor solar battery cabinet.

1000V level DC to DC solar charge controller, used together with ATESS PCS and Bypass for large scale solar projects. Bypass cabinet is designed to be used together with bidirectional battery ...

With IP54/IP55 protection, anti-corrosion design, and intelligent temperature control, they are ideal for telecom base stations, remote power supply, and containerized microgrids. Our outdoor cabinets are ...

The outdoor energy storage system supports the flexible expansion of PV capacity and simultaneous access to load, battery, grid, DG, and PV, highlighting its role tailored for small C& I energy storage ...
