Imagine a world where energy storage is as transparent as glass yet powerful enough to support entire cities. That's the promise of Kingston Power Generation Glass Energy Storage--a cutting-edge ...

The complex is a massive natural gas power plant that will replace the existing Kingston Coal Plant in Harriman, about 40 miles west of Knoxville.

TVA's 1.3-GW Kingston Fossil Plant, slated for retirement in 2027, is located on the Clinch River arm of Watts Bar Reservoir near Kingston, Tennessee, on approximately 800 acres.

To replace the generation, TVA will build an energy complex that will house at least 1,500 megawatts of combined cycle and dual-fuel Aeroderivative natural gas combustion turbines with 100 ...

The gas plant will be part of a new energy complex. TVA plans to add 100 megawatts of battery storage and up to 4 megawatts of solar power to the site later on.

The Tennessee Valley Authority is making progress on its transformation of the aging Kingston Fossil Plant, a new facility that will include ...

TVA is building what it calls the Kingston Energy Complex, a combination of 1,550 megawatts of natural gas, 100 megawatts of batteries and up to four megawatts of solar panels. The complex next...

Kingston Fossil Plant will become a state-of-the-art energy complex that includes natural gas, solar energy, and battery storage -- the first of its kind for TVA.
