Our newly launched liquid cooling energy storage system represents the culmination of 15 years" expertise in lithium battery storage ...

Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and minimizing capital expenditures (CAPEX).

All-in-one design with liquid cooled battery rack pre-installed and a plug and play interface for auxiliary power supply, communication, and DC connection, which can be installed as a ...

Designed for industrial and commercial energy storage applications, these solutions ensure safety, reliability, and optimal performance with advanced liquid cooling technology and a 10+ ...

Featuring liquid-cooling DC battery cabinet, this system excels in performance and efficiency. Its design optimization slashes lead time by 50% compared to traditional Battery Energy Storage System ...

Featuring liquid-cooling DC battery cabinet, this system excels in performance and efficiency. Its design optimization slashes lead time by 50% compared to ...

The liquid cooling battery cabinet is a distributed energy storage system for industrial and commercial applications. It can store electricity converted from solar, wind and other renewable energy sources.

Our professional R& D team focuses on meeting the individual needs of our clients, tailored to create efficient and stable battery solutions that facilitate the successful implementation of projects.
