What is long-duration energy storage (LDEs)?

Today's energy storage technologies are not sufficiently scaled or affordable enough to meet energy demand that fluctuates throughout the day and night. Long-duration energy storage (LDES) is a cost-effective option to increase grid reliability and resilienceso that reliable,affordable electricity is available whenever and wherever to everyone.

What is the long-duration energy storage portfolio?

The Long-Duration Energy Storage portfolio helps to advance LDES systems toward widespread commercial deployment. The goal of this portfolio is to fund projects that will overcome the technical and institutional barriers that exist for deployment,with a focus on different technology types for a diverse set of regions.

What are energy storage contracts?

These contracts allocate the risks of project development,construction,and performance between the partiesand include the price that will be paid by the utility for the resource or the energy storage services that are to be provided.

What is the long-duration energy storage pilot program?

Long-Duration Energy Storage Pilot Program: These projects will advance a diverse set of LDES technologies towards commercial viability and utility-scale demonstrations. Read the OCED News Alert announcing the Notice of Funding Opportunity,published September 2024. Download the Notice of Funding Opportunity,issued September 2024.
