Will the Philippines' biggest solar-powered pump irrigation project boost agricultural production?

MANILA, Philippines -- President Marcos inaugurated yesterday the country's biggest solar-powered pump irrigation project that is seen to boost agricultural production. The P65.7-million Cabaruan Solar-Powered Pump Irrigation Project (SPIP) in Quirino, Isabela is expected to irrigate 350 hectares of rice field, benefitting 237 farmers.

Is solar irrigation a viable solution to sustainable agriculture?

Solar irrigation presents a promising solution to promote sustainable agriculture, particularly in regions facing water and energy scarcity. This case study investigates the benefits and challenges of adopting solar-powered irrigation systems (SPIS) among small-scale farmers in the Philippines.

How does the NIA provide sustainable irrigation services to the Filipino farmers?

As the NIA remains committed to its mandate of providing efficient, reliable, and sustainable irrigation service to the Filipino farmers, the Agency continues to harness renewable energy through the development of solar, floating solar, and hydroelectric power projects on its existing and future irrigation systems.

What challenges do agrivoltaics face in the Philippines?

Despite its potential, agrivoltaics faces several challenges in the Philippines. The high initial costs of installing solar panels and the necessary infrastructure can be a barrier for small-scale farmers. Technical expertise and logistical support are also needed to design and maintain these systems effectively.

The authorities in the Philippines have inaugurated the country's largest solar-powered irrigation system, featuring more than 1,000 solar panels ...

The Cabaruan SPIP is a project of the National Irrigation Administration (NIA) under the Mangat River Integrated Irrigation System ...

MANILA, Philippines -- The solar irrigation project of the National Irrigation Administration (NIA) would be a game-changer for farmers because it ...

The authorities in the Philippines have inaugurated the country's largest solar-powered irrigation system, featuring more than 1,000 solar panels and two submersible pumps.

The said project provides irrigation water supply to 150 hectares of agricultural land in San Rafael, Bulacan
