How does the Federal Government procure a solar system?

The federal government procures construction services and materials for solar systems through multiple agencies. All procurement notices for federal contracts over \$25,000 are posted on the System for Award Management (SAM) website. For example, a 5-MW solar system at Fort Campbell in Kentucky was installed in 2017 and accounts for 10% of the base's energy needs.

What is modular contracting?

39.103 Modular contracting. 39.103 Modular contracting. 39.103 Modular contracting. (a) This section implements 41 U.S.C. 2308. Modular contracting is intended to reduce program risk and to incentivize contractor performance while meeting the Government's need for timely access to rapidly changing technology.

What is a solar RFP?

A Request for Proposal (RFP) is a formal bid document to ask vendors to provide proposals for desired projects, as required by many public agencies (federal, state, local). A solar RFP outlines the photovoltaic (PV) product or service requirements, the contract terms, and bidding process.

What are the different types of price in federal solar contracts?

Federal solar contracts can have different types of price, including fixed-price contracts, cost-reimbursement contracts and incentive-type contracts.

Government bids, RFPs and contracts are gathered by GovDirections and classified by state contract and delivered via a daily email alert to registered contractors.
