Will Morocco become a key supplier of batteries for electric vehicles?

The project, led by Chinese company Gotion High-Tech, will place Morocco at the heart of the global clean energy race, transforming the country into a key supplier of batteries for electric vehicles and renewable energy storage.

What's going on with EV batteries in Morocco?

The battery industry chain centered around LFP is forming rapidly. In June this year, the Moroccan government announced that Gotion High-Tech would invest \$1.3 billion (US) to build a gigafactory for EV batteries.

What is Morocco's energy storage testbed project?

The projects are spearheaded by the Moroccan Agency for Sustainable Energy (MASEN) and Morocco's national electricity company ONEE. On May 20, 2025, MASEN received financing approval from the World Bank for its "Morocco Energy Storage Testbed Project", aiming to enhance grid stability.

Why does Morocco invest in batteries?

Morocco's economic diplomacy considers the battery sector to be an essential lever for attracting investment and strengthening its global competitiveness. Following its agreements with France as a strategic partner in this field, Morocco has consolidated new alliances with other global players, such as China, Japan and the United States.

The Office National de l'Électricité et de l'Eau potable (ONEE) has initiated a battery energy storage project with a total capacity of 1600 megawatt-hours (MWh) to ...

A local media report, citing Onee, reported that the North African state plans to invite bids for a battery energy storage system (bess) project with a ...

Morocco is set to make history as the host of Africa's first battery gigafactory, backed by a landmark \$5.6 billion investment from China. The ...

To address this, Morocco is resolutely focusing on lithium iron phosphate (LFP) batteries, a reliable, durable technology suited to local constraints. This choice is part of a national strategy for ...

Welcome to Morocco - North Africa's sleeping energy giant now wide awake and building stable energy
