The Origin Energy Power, Mortlake Battery Energy Storage System (BESS) project is a 300 MW/ 650 MWh BESS utilising SMA inverters with grid-forming functionality enabled.

The Project is a 300MW/650MWh BESS project being developed by Origin Energy Power Limited (Origin) on land adjacent to Origin's existing gas fired power station located in Mortlake, ...

When installed within the Mortlake Terminal Station, they will play a crucial role in converting the battery's stored energy to a higher ...

d operates the Mortlake Power Station in Mortlake, Victoria. Origin has approved construction of a large-scale BESS adjacent to the power station, with a generation capacity of ...

The Project is a 300MW/650MWh BESS project being developed by Origin Energy Power Limited (Origin) on land adjacent to Origin's existing gas fired power station located in Mortlake, Victoria. The ...

When installed within the Mortlake Terminal Station, they will play a crucial role in converting the battery's stored energy to a higher voltage, allowing it to be efficiently transmitted into ...

Each BESS plant shall be available for dispatch by the DSO for flexibility services for 98% of the time, calculated every operational year (equivalent to 358 calendar days). Each BESS plant shall be able ...

Origin has announced that construction of the 300MW large-scale battery at Mortlake Power Station has officially commenced.
