How much does a solar project cost in Turkey?

Turkey has awarded 800 MW of solar capacity in its latest PV tender, with the final price set at \$0.0325/kWh. The authorities selected six projects ranging from 40 MW to 385 MW. Turkey's Ministry of Energy and Natural Resources said it has allocated 800 MW of PV capacity in the YEKA GES-2024 tender.

Is solar power a good investment in Turkey?

Economic Competitiveness: Solar power has achieved grid parity across most of Turkey, with levelized costs of electricity (LCOE) ranging from \$0.048-0.062/kWh compared to natural gas power costs of \$0.089-0.112/kWh. This cost advantage continues to widen as solar technology costs decline and natural gas prices remain volatile.

How much solar power will Türkiye have by 2035?

According to government plans, the total installed capacity will reach 190 GW by 2035. According to the Energy Market Regulatory Authority's (EMRA) statistics, Türkiye's cumulative solar capacity reached 19.4 GW at the end of 2024, scoring almost 37 % increase and doubling the capacity in just two and a half years.

Which solar companies in Turkey will increase production capacity by Q1 2024?

With three production bases across Turkey, Smart Solar Technologies projects a substantial increase in production capacity by Q1 2024. Listed on the BIST50 Board of the Istanbul Stock Exchange in 2023, the company emphasizes responsibility and human rights. 7. Ankara Solar
