Located in the Dedza district of Malawi near the town of Golomoti, the 20MWac solar PV and 5MW/10MWh energy storage project is set to become a leading project in sub-Saharan Africa ...

With only 20% of Niger's rural population connected to the national grid, energy storage inverters have become a lifeline for communities and businesses. These devices bridge the gap ...

With only 20% of Niger's rural population connected to the national grid, energy storage inverters have become a lifeline for communities and businesses. These devices bridge the gap between solar ...

Design challenges associated with a battery energy storage system (BESS), one of the more popular ESS types, include safe usage; accurate monitoring of battery voltage, temperature and current; and ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems.

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and ...

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and the Southern ...

The project construction period is expected to be 18 months, including the construction of 9.52MW Solar power plants, 14.5MWh Battery Energy Storage System and the 33kV MV booster ...
