Why is the Nordic region a key energy storage provider?

With existing interconnections to the UK, Germany, the Netherlands, Poland, and the Baltics, the Nordic region already serves as a key energy storage provider for the rest of Europe. Many Nordic hydropower plants are upgrading their control systems to improve its responsiveness.

What are the emerging technologies in the Nordics?

Here are some of the emerging technologies in this transformation: Battery energy storage solutions (BESS) are expanding across the Nordics, starting from a low base, supported by significant price reductions in recent years. (See news of the first larger BESS debt financing in the Nordics.)

How is digitalisation transforming the Nordic power sector?

Digitalisation is transforming the Nordic power sector, enabling smarter, more efficient, and more resilient energy systems. Advanced digital tools are being deployed across the value chain, from generation and grid operations to market platforms and customer interfaces, enhancing transparency, automation, and responsiveness.

Can offshore wind be a cornerstone of the Nordic energy transition?

Offshore wind is positioned to become a cornerstone of the Nordic energy transition, offering vast potential in the North Sea, Baltic Sea, and along Norway's deep coastal waters.

You know, when people talk about European energy storage, Germany and Sweden usually steal the spotlight. But here's the thing - Finland's quietly been building a world-class battery ecosystem that's ...

Meta Description: Explore how Nordic countries lead in exporting advanced energy storage batteries, supporting renewable integration and grid stability. Discover market trends, case studies, and why ...

In the Nordic countries (Denmark, Sweden, Norway & Finland), renewable energy (RE) already makes up more than half of the generation mix in each country. The high penetration of RE ...

In the Nordic countries (Denmark, Sweden, Norway & Finland), renewable energy (RE) already makes up more than half of the ...

Battery Energy Storage Systems (BESS) lead the Nordic energy storage market in 2025, making up about 40-50% of the total market value. Lithium-ion technologies head this ...

The Nordic Way is a growing collection of energy indicators for the five Nordic countries. Browse by topic using the menu to the right, or take a ...

You know, when people talk about European energy storage, Germany and Sweden usually steal the spotlight. But here's the thing - Finland's quietly been building a world-class battery ...

From Arctic-tested durability to smart grid integration, Finland's energy storage exports deliver solutions where others falter. As the world transitions to renewables, these Nordic innovations are powering ...
