-----

“Think of supercapacitors as the sprinters of energy storage,” says Dr. Lena Fjellström, project lead at Nordic Energy Research. “They’re not here to replace marathon ...

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's ...

This article explores the Nordic energy storage market's unique opportunities, technological innovations, and practical applications for commercial and industrial users.

Mikel elaborated on three quick questions about the current state and future outlook of the Nordic renewable energy market, particularly focusing on the rising interest in ...

Danish energy company Nordic Solar has announced the successful signing of a credit agreement for its inaugural battery storage project in Borup, near Hillerød, north of Copenhagen.

By combining solar power generation with battery storage, Nordic Solar aims to ensure a more stable energy supply while enhancing the long-term value of its renewable ...

Support for intermittent renewables: With the increasing share of solar and wind power in the Nordic energy mix, batteries can store excess energy generated during peak production times ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.
