The status of these energy storage technologies in Finland will be discussed in more detail in the next sub-sections, giving a better understanding of the current and potential role of these ...

Hitachi Energy has signed an agreement with Nordic Electro Power (NEPower) to provide advanced power conversion technology for Finland's ...

PowerStack provides a modular battery design that can be configured to meet various power storage requirements. By arranging modular units in strings of up to 1,230 VDC, the system can scale from a ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and ...

This Northern Europe project implements a large-scale containerized energy storage solution to support utility-scale energy storage and grid stability. Each container contains battery modules, inverters, and ...

OX2 has sold its 50MW/110MWh battery energy storage project in Uusnivala, Finland, to the L& G NTR Clean Power Fund. The project will help regulate grid frequency and stability and participate in ...

“Think of supercapacitors as the sprinters of energy storage,” says Dr. Lena Fjellström, project lead at Nordic Energy Research. “They’re not here to replace marathon-runner batteries, but ...
