---

Support natural heat dissipation / refrigeration / heat pump / PTC preheating constant temperature multi-mode operation. Withstand all kinds of high ...

Single cabinet footprint reduced by over 20%, with multi-unit scalability for increased capacity. High-efficiency liquid cooling technology maintains a battery ...

The MPINarada NESP Series LFP High Capacity Lithium Iron Phosphate batteries are designed for a broad range of BESS solutions providing a wide operating temperature range, while delivering ...

Product Introduction NVWA-X, an outdoor liquid-cooled battery cabinet, supports multiple parallel connections, and supports installation in special-shaped places. NVWA also supports ...

The MPINarada NESP Series LFP High Capacity Lithium Iron Phosphate batteries are designed for a broad range of BESS solutions providing a wide operating ...

A Site Battery Storage Cabinet is a modular energy backup unit specifically designed for telecom base stations. It houses lithium-ion batteries (typically LFP), BMS, EMS, and optional thermal ...

Single cabinet footprint reduced by over 20%, with multi-unit scalability for increased capacity. High-efficiency liquid cooling technology maintains a battery system temperature difference of less than ...

At the start of the test, the room ambient temperature shall not be less than 10°C (50°F) nor more than 32°C (90°F). Any access door(s) or panels on the initiating BESS unit and adjacent target BESS ...
