DC Cabinet is an advanced liquid-cooled outdoor energy storage cabinet designed to support 200+ kW applications with rapid deployment and a minimal footprint, renowned as its integrated safety features.

Key priorities include grid modernization, large-scale energy storage, and expanded research into next-generation technologies. The strategy ...

Safety designs such as water and electricity separation, three-level fire protection + explosion venting + exhaust, liquid cooling + dehumidification design, all ensure the safety of the energy storage ...

As Oslo proves, off-grid solar storage isn't about surviving the apocalypse - it's about rewriting the energy rulebook. And if they can do it with six months of winter and 3AM ...

By integrating DC appliances directly into your solar power system, you can streamline your energy use, reduce losses, and extend battery life. The result: more reliable operation, lower ...
