Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging technology in North America and is planned to be deployed ...

More than 60 speakers lined up Thursday to speak to the City of Ottawa's Agricultural and Rural Affairs Committee over a proposal to build a vast electrical storage facility in West Carleton.

Whether you're managing a hospital's backup power or integrating wind farms, Ottawa energy storage batteries offer more than just kilowatt-hours - they provide energy independence in an uncertain ...

The City of Ottawa's Agriculture and Rural Affairs Committee has voted to approve changes to the city's Official Plan that would set out the land use policy direction for building battery...

The latest addition to our lithium containment portfolio, the Lithium-Ion Battery Cabinet enables safe storage of batteries with full containment in case of a thermal runaway.

The project can store 250 MW of electricity, making it the largest battery energy storage system proposed in the Ottawa area so far. A 250 MW battery can supply enough power at one ...

On May 9, 2024, the IESO announced that ten proposed BESS projects were selected, totaling 1,784 megawatts (MW) of energy storage, including two to be located in rural west Ottawa.

On May 9, 2024, the IESO announced that ten proposed BESS projects were selected, totaling 1,784 megawatts (MW) of energy storage, including two to be ...
