In-house IoT EMS hardware and software provide cost-effective solutions for managing distributed energy resources. Scalable from single asset control to complex microgrid and utility environments.

The “all-in-one” design integrates batteries, BMS, liquid cooling system, heat management system, fire protection system, and modular PCS into a safe, efficient, and flexible energy ...

Space-saving: using door-mounted embedded integrated air conditioners can save space in the cabinet by not occupying any space, improving the available space, enhancing the top ...

The ELECOD Outdoor Cabinet Energy Storage System (Air-Cooled) is a highly efficient and scalable energy storage solution, designed for use in microgrid scenarios such as commercial, industrial, and ...

Built for durability with IP67-rated battery modules and IP54-rated cabinets, Guardian Outdoor is ideal for reliable performance in challenging environments. Battery cells are submerged in non-toxic ...

Space-saving: using door-mounted embedded integrated air conditioners can save space in the cabinet by not occupying any space, improving the available space, enhancing the top structural integrity, ...

Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and minimizing capital expenditures ...

Built for durability with IP67-rated battery modules and IP54-rated cabinets, Guardian Outdoor is ideal for reliable performance in challenging environments. Battery cells are submerged in non ...
