What is a solar mounting system?

Solar mounting systems are essential in anchoring your solar power system to a fixed point, such as the ground, a roof, or a pole, etc. We carry a wide variety of mounting systems and custom design each mounting system to order. For Unirac and ground-mount orders, please email [sales@mrsolar.com](mailto:sales@mrsolar.com) or call 888.680.2427 for custom design and purchase.

Why should you install a Solar Node?

Power-Saving Tip: For static nodes, disabling unnecessary features like GPS positioning can extend operational time during periods of limited sunlight. Proper final assembly ensures your node's longevity and reliability. Proper installation is crucial for optimizing both solar charging and communication performance.

Why should I build a solar-powered meshtastic node?

By building and deploying your own solar-powered Meshtastic node, you're not just creating a device--you're participating in a growing movement toward more sustainable, resilient, and independent communication solutions. Error in getting data. Step-by-step guide to building a solar-powered Meshtastic node using the Wio Tracker 1110.

Explore our extensive selection of mounting hardware, essential for securely installing your solar panels and optimizing their performance. Our products are designed for durability and ...
