What is Aboitiz Power's Bess project?

Aboitiz Power commits P1.2B to a pioneering hybrid BESS project in the Philippines. This model, integrating battery storage into thermal plants, is a blueprint for climate-resilient energy and grid stability in Asia.

Why should you choose a Bess facility?

The smart and efficient services of BESS facilities allow for a more robust integration of renewable energy sources such as solar and wind energy to the grid. Our battery energy storage business is one of the ways we show our commitment to sustainable energy, as our BESS facilities also operate with zero emissions.

What is the outlook for Bess in the Philippines?

While the outlook for BESS in the Philippines is bright, challenges remain. The DOE acknowledges the high upfront costs of battery storage systems. A lack of standardization and concerns about the environmental impact of certain battery technologies, particularly lithium-ion, also pose challenges.

How many Bess facilities are there in the Philippines?

We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions.

We are committed to developing and deploying BESS solutions that help to reduce greenhouse gas emissions and promote sustainable development in the Philippines.

BESS technology, which enables the storage of energy both from renewable and non-renewable sources, was actually pioneered in the Philippines as far back as 2016 by ...

The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. Our acquisition of Masinloc BESS is a landmark milestone that drives the Philippine ...

The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future.

Summary: Discover how Battery Energy Storage Systems (BESS) are transforming off-grid power supply in the Philippines. This guide explores practical applications, renewable energy integration, ...
