What is Santo Domingo Port?

Is the oldest terminal of the Port; it has been totally renovated as part of an integrated rehabilitation project of the port of Santo Domingo, this area is dedicated to the storage of containers and loose cargo. With its main dock and a total of two warehouses to store the export and import cargo.

What is Don Diego Terminal?

1. DON DIEGO TERMINAL Don Diego is a contemporary terminal, designed to take advantage of natural light and easy access to the Colonial City. The terminal has two reception areas for cruise ships and other types of ships, the North and South wings. This facility also offers the possibility of handling car carrier operations.

What are outdoor Telecom cabinets?

Outdoor telecom cabinets are built to withstand harsh environmental conditions. These enclosures protect telecommunication equipment from rain, dust, extreme temperatures, and unauthorized access. They are commonly used in remote locations, such as cell tower sites, roadside installations, and industrial areas.

What is an indoor Telecom cabinet?

Indoor telecom cabinets are designed for controlled environments like data centers, server rooms, and office spaces. These enclosures provide a secure and organized space for housing telecommunication equipment. Since they are used indoors, they do not require extensive weatherproofing.
