Our team designed a 250kWh cabinet system with three-phase balancing and thermal management specifically for humid environments. The result? 18% monthly energy savings from day one.

The outdoor photovoltaic energy cabinet can provide reliable housing for network servers, edge computers, professional equipment, monitoring systems, photovoltaic, and battery systems.

An Outdoor Photovoltaic Energy Cabinet is a fully integrated, weatherproof power solution combining solar generation, lithium battery storage, inverter, and EMS in a single cabinet.

It is built specifically for outdoor installation and integrates advanced LiFePO4 battery technology, a high-level battery management system, and secure weatherproof housing, making it ideal for ...
