How much does solar power cost in Australia?

Accordingly,the uptake of commercial solar power has increased significantly in Australia in the last several years. As per the table,the average cost of a 100kW solar power system as of August 2024 is $87,920including GST and the STC upfront rebate.

How much does a 100kW Solar System cost?

As per the table,the average cost of a 100kW solar power system as of August 2024 is $87,920including GST and the STC upfront rebate. The graph below - from our Commercial Solar PV Price Index - shows average price trends for 100kW solar systems since Solar Choice started keeping track in May 2014.

Should you buy a solar battery in Australia?

Solar battery demand in Australia has doubled in the last five years -- and for good reason. With more than 3 million homes now using solar, adding a battery is the logical next step. A solar battery allows you to store excess solar energy during the day and use it at night instead of buying costly grid electricity. This gives you:

What is a 100kWh solar battery?

When we say "100kWh solar battery," that refers to its total storage capacity: roughly 100 kilowatt-hours of energy ready to use. These batteries are typically lithium-ion commercial-grade units,often VPP-ready (Virtual Power Plant capable),so you can integrate into larger energy networks if you choose.

In this 2025 expert pricing guide, we"ll break down the solar battery storage price in Australia, including costs per kWh, installation pricing, top ...
