How much does a battery cost in Israel?

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. From ESS News Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

How much energy does Israel use?

Gasoline and diesel prices peaked in 2021, and both fell by 9% in 2022. Israel's consumption per capita is 2.5 toe (i.e., 20% less than the Middle East average), including around 6 500 kWh of electricity (65% above the regional average) (2023).

What is Israel doing with solar energy?

Total energy consumption has remained quite stable since 2021. Israel is ramping up efforts in the solar sector, with 1.3 GW of projects under development. It awarded 12 licenses to six companies in 2023 as part of the 4th Offshore Bid Round. The Ministry of Energy and Infrastructure supervises the energy sector.

What does IEA's energy auction mean for Israel?

The auction, managed by the Israeli Electricity Authority (IEA), will facilitate the deployment of large-scale energy storage systems designed to integrate more renewable energy into the grid. With total investments estimated at ILS 3 billion (~\$840 million), the projects are expected to commence operations in 2027.

How much does a battery cost in Israel? Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh.

The Israel energy market data since 1990 and up to 2024 is included in the Excel file accompanying the Israel country report. It showcases the historical evolution, allowing users to easily work with the data.

Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.
