How much does a DC fast charger cost?

According to a study from the International Council on Clean Transportation, DC Fast Chargers (DCFC) cost approximately \$28,000 to \$140,000 installed. This is the total installation cost per station. Factors that drive costs include the kW charging capacity, the brand of DC Fast Charger, sitework necessary for installation, and local labor rates.

What is an electric car charging station?

A charging station is a device that supplies electrical power to plug-in electric vehicles. An electric car charging station has various components, including wires, displays, cords, meters, controllers, and a charging port. These components are also known as electric vehicle supply equipment (EVSE).
