What services are included in a solar PV contract?

The services included by the contractor shall include operation and maintenance of all components of solar PV systems for the life of the contract, as detailed herein.

What is a solar power purchase agreement (PPA)?

A solar power purchase agreement (PPA) is a financial contract in which a third-party developer owns, operates, and maintains the photovoltaic system, and a customer agrees to purchase the system's electric output from the solar services provider for an agreed-upon price and for a predetermined period.

How does a solar power contract work?

The contractor shall generate safe and reliable renewable energy from solar photovoltaic (PV) systems sited on federal government property over the contract life. The electricity shall feed into government electrical distribution systems on the "customer side" of utility meter.

Who determines the final content of a solar PV solicitation?

Agency contract officers, attorneys, and engineers are responsible for determining the final content of any solicitation. Updated to the regulations, codes, and standards applicable to solar PV are changing frequently; it is the responsibility of agency managers to determine which guidelines (and which versions) apply. Figure 1.

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.
