Does the Pu's energy storage procurement framework support workforce development?

The PU's Energy Storage Procurement Framework provides crucial motivation to the development of both demand and supply in this marketplace. In this section, we describe evidence of workforce development with a focus on the energy storage supplier activity.

Why do companies bid for energy storage tenders?

Bidding for energy storage tenders is extremely lucrative for companies of all sizes. Tendering authorities and private companies release thousands of contracts worth millions for procurement of energy storage. Global Tenders stands out as the largest platform dedicated to tenders and government contracts.

What is California's energy storage procurement framework?

California's energy storage ecosystem, built since Assembly Bill 2514 and through 2021, includes a crucial component: the PU's Energy Storage Procurement Framework. This framework motivates the development of both demand and supply in the energy storage marketplace.

What type of energy storage projects are recent contracts for?

Recent contracts are predominantly for much larger transmission-connected energy storage projects. Earlier energy storage contracts were significantly more expensive across all grid domains, and they generally reflect the cost reductions seen in the global storage industry.
