What size server rack do I Need?

Server Racks come in a range of heights to suit your requirement, from 12U up to 47U. The cabinets are fitted with quick release front and rear perforated doors (approximately 60% open), fitted with lockable swing handles. The side panels can be fitted with cabinet locks.

What does it want in a server rack?

IT wants the server rack or network cabinet to be on time, assembled without problems, and with design that stands the test of time and best practice. - Both want cold rolled steel and innovation that keep up with the highest quality industry standards.

How deep should a server rack be?

The average depth for a server rack is about 36". On top of making sure there is enough depth for your equipment, make sure that any rails or shelves you would like to use are compatible. ? What internal and external width do I need? Most server chassis have a width of 19 or 23 inches in order to keep things consistent.
