What are corrosive and acid storage cabinets?

These cabinets are designed to handle the most sensitive materials in work environments. Specialized leak-proof lining: Our corrosive and acid storage cabinets include specialized inner protection that controls leaks and keeps your employees and customers safe.

Are your storage cabinets corrosive?

All of our storage cabinets meet OSHA and NFPA Code 30 regulations and have inner protection to avoid leaks and keep employees away from harm. Additionally, all corrosive storage cabinets come with galvanized steel shelves and are finished in blue corrosive-resistant urethane. Need help finding what you are looking for?

What is a corrosive-resistant urethane cabinet made of?

Each cabinet is made of galvanized steel and finished with blue corrosive-resistant urethane -- which means quality construction you can always count on for full protection. Full code compliance: The federal government mandates corrosive and acidic materials with OSHA and NFPA Code 30 regulations because they are dangerous in the workplace.

Why do I need a telecommunications cabinet?

These cabinets also make it easy for technicians to reach the ports they need to expedite service. Patch panels: If your telecommunications system incorporates patch panels to connect and manage your incoming network cables, you can keep them safely stored in your cabinet.
