Our battery enclosures can be pole-mounted or ground-mounted and are suitable for indoor and outdoor applications. If you are not sure which enclosure you should choose, please don't ...

Safety designs such as water and electricity separation, three-level fire protection + explosion venting + exhaust, liquid cooling + dehumidification design, all ensure the safety of the energy ...

Ideal for large factories, shopping malls, industrial parks, utility-scale solar/wind farms, and microgrids, it enhances energy independence, reduces high grid demand charges, and ...

That's the reality for many industries - and it's exactly why industrial frequency off-grid energy storage systems are becoming as essential as coffee in a control room.

Enables the California Independent System Operator (CAISO) to dispatch energy from our batteries at any time to help balance supply and demand on the statewide grid.

Ideal for large factories, shopping malls, industrial parks, utility-scale solar/wind farms, and microgrids, it enhances energy independence, reduces high grid ...

The CAB1000 is a scalable power inverter that provides reliable energy conversion for applications of any size. Designed for both UL and IEC markets, it's the easy-to-use building block that gets your ...

Designed for energy storage systems for solar power, diesel-PV hybrid, and EV charging integration, this cabinet offers a flexible and scalable solution for ...
